

What is Fast ForWord®?

Based on over 30 years of scientific research on how the brain learns, the Fast ForWord® family of products are designed to help elementary, middle and high school students develop and strengthen memory and sequencing skills, attention, auditory processing, processing speed and the language skills essential for academic success. Neuroscience research has proven that difficulties with language and auditory processing can have adverse repercussions on cognitive skills and academic performance.

What is the Fast ForWord Family of Products?

Fast ForWord Language - Elementary Students

Fast ForWord Literacy - Middle & High School Students

These initial products in the Language and Literacy series build foundational reading and language skills while improving memory, attention and processing rates so students can become successful learners.

Fast ForWord Language to Reading - Elementary Students

Fast ForWord Literacy Advanced - Middle & High School Students

These products help students make the link between spoken words and reading. They continue the cognitive strengthening of the initial series and bundle it with advanced practice in grammatical structures and comprehension.

Fast ForWord Reading

Applying the discoveries of neuroscience, the Reading series (1-5) is a reading intervention solution that increases processing efficiency and builds critical reading skills - everything from phonics to passage comprehension.

How Does Fast ForWord® Work?

Fast ForWord® products use patented technologies that leverage the science and opportunity of the brain's ability to change at any age throughout life. By exercising processing skills through intensive, adaptive activity, actual physical changes occur in the brain providing a foundation for learning and reading success.

Why Does Fast ForWord Work?

Fast ForWord® is efficient, effective and enduring.

Efficient - Your child will gain 1-2 years in language skills, thus forming the foundation for improved reading, in just 4-12 weeks.

Effective - Independent research has repeatedly shown that Fast ForWord® products (following the recommended protocol) actually build the processing efficiency of the brain.

Enduring - Fast ForWord® software's unique neuroscience products develop cognitive skills that last a lifetime.

FAST FORWORD

Is My Child a Candidate?

Does your child

- ★ Struggle with homework?
- ★ Misunderstand what you say?
- ★ Give slow or delayed responses?
- ★ Get confused in noisy situations?
- ★ Have an attention problem?
- ★ Have difficulty with reading or learning to read?

If you answered "yes" to one or more of these questions, your child may be a candidate for Fast ForWord®.

How Do I Get My Child Started?

Call *Speech Plus* to discuss your concerns and see if Fast ForWord® is the right fit for your child. Once enrolled, a schedule will be developed to meet your child's needs. The protocol is five days/week with the time played each day customized to your child.
