

June 2015...Summer is almost here!

Did you know that June 19 is Summer Learning Day? This is a national advocacy day recognized to spread awareness about the importance of summer learning for our nation's youth.

Studies show that students lose as much as 2-3 months of reading and math skills over the summer.

Our summer schedule begins June 15. Our clinicians provide an experience that is positive, enriching, and effective in a relaxed, caring environment. Our motto is "Lets learn new skills and have fun, too!" Many families employ more intense therapy over the summer to accelerate progress. Summer openings are limited, so call now!

If you have any questions about a plan for your child for the summer, please do not hesitate to call me.

Enjoy the sunshine!

Renee H. Matlock, MA, CCC-SLP

Speech-Language Pathologist

Executive Director

Fast ForWord Family of Programs

"Oh, I didn't know you did that!"
is a phrase we often hear.

Back by popular demand...

**Executive Function
Summer Camp
Aug. 4 - Aug. 7**

Call for details!

Based on over 30 years of scientific research on how the brain learns, Fast ForWord is designed to help students develop and strengthen the skills necessary for academic success. [Learn more](#) about this

program.

Wilson Reading Program

The Wilson Reading Program is an Orton-Gillingham based curriculum for teaching decoding and encoding. The program is organized around the six syllable types found in the English [language](#).

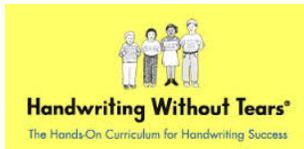

Social Thinking Groups

Based on the work of Michelle Garcia Winner, our groups teach a range of skills from perspective taking to interpreting and responding to the nuances of verbal and non-verbal communication. Students learn ways to more easily "fit in" and establish

and maintain [friendships](#).

Handwriting Without Tears

The [Handwriting Without Tears](#) printing and cursive programs draw from years of innovation and research to provide developmentally appropriate, multisensory tools and strategies.

Chatterbugs Preschool Language Therapy

Chatterbugs focuses on the early identification and treatment of speech and language difficulties in children 3 to 5 years old. Research has shown that early speech and language delays can lead to later difficulties learning to read, write and spell. For more information, [click here](#).
